SignLink (with 5/16" x 1" bolt)

These nylon brackets are designed to work with multiple sizes of chain link fence and will not rust. They attach behind the sign thereby sandwiching the fence between the bracket and the sign.

SignLink should be installed around the perimeter of a sign. Install SignLink at the corners of the sign. Install additional SignLink every 2'-3' around the perimeter of the sign as illustrated below.

Made in Canada

SignLink material: Nylon

Galvanized steel bolt: 1" length bolt w/ 5/16th" coarse thread.
